ABSTRACT

SABABAN, JOAN VIRAY. Marketability of Brewed Coffee: Aguinaldo Blend of Cavite State University. B. S. Thesis. Bachelor of Science in Business Management major in Marketing. Cavite State University. Indang, Cavite. April 2004. Adviser: Dr. Nelia C. Cresino.

The consumer's acceptance and marketability of Aguinaldo Blend was determined. Market channels, promotion strategies and the problems encountered in producing and marketing of product were also identified.

Data were gathered from three groups of respondents, namely: panelists, consumers and producer through sensory evaluation and personal interview. Rank, frequency count, mean and percentage were used in the analysis.

Four selected brands of brewed coffee including Aguinaldo Blend were used to determine the consumer's acceptance and marketability of CvSU brewed coffee. Of these brands, only Aguinaldo Blend was accepted at the "like extremely" level in the sensory evaluation. The remaining brands were accepted at "like moderately" level. The consumers based on their color, aroma and taste accepted the product objectively. Aguinaldo Blend was the brand found to be not competitive in terms of availability. Some consumers pointed out that product supply is limited compared to their competitors.

The CvSU Research Center had difficulty in production because of unavailability of raw material and high cost of production.

MARKETABILITY OF BREWED COFFEE: AGUINALDO BLEND OF CAVITE STATE UNIVERSITY^{1/}

Joan V. Sababan

^{1/} A thesis manuscript submitted to the faculty of the Department of Management, College of Economics, Management, and Development Studies, Cavite State University, Indang, Cavite in partial fulfillment of the requirements for graduation with the degree of Bachelor of Science in Business Management major in Marketing with Contribution No.T2004-BM04-106. Prepared under the supervision of Dr. Nelia C. Cresino.

INTRODUCTION

The commonly grown coffee species in the Philippines are Arabica, Robusta, Excelsa and Liberica. The most widely traded varieties are Arabica and Robusta. Arabica grows at high altitudes and is cultivated for its elegant and complex flavor. By contrast, Robusta grows well in lower altitudes and has a harsher flavor.

About 71 percent of world coffee productions are Arabica, 28 percent Robusta and the remaining percent are Excelsa and Liberica. In 1998, the biggest producers were Brazil (26%), Colombia (11%), Indonesia (7%) and Vietnam (6%). The Philippines supplied only about two percent of global output.

Domestic production of coffee fell by seven percent in 1998 due to the El Niño. While the supply is on the downtrend, the proliferation of coffee shops buoyed local demand. Mindanao accounted for 70 percent of the total production, Luzon for 24 percent and the Visayas, six percent (University of Asia and the Pacific, 2000).
