Illustrated Handbook of Animal Husbandry

The animal production system is predominantly part of a mixed crop-livestock farming system vital for the security and survival of large numbers of poor people. In such systems, livestock generate income; provide employment, draught power and manure. This production system assumes special significance in the present context of sustained economic growth, rising income, increasing urbanization, changes in taste and preference that have led to dietary changes reflecting the importance of milk and meat.

Cattle have been and are of considerable importance and utility to farmers all over the world. This Illustrated Handbook of Animal Husbandry is a real comprehensive integrated text to provide educational concepts and self-study guide for students, researchers, teachers, and administrators interested in the study of Animals. It recognizes that farmers need to be equipped to take care of their animals through better management, nutrition, feed, fodder and preventive healthcare.

Features:

- Attempts to provide basic information on breeding, healthcare, management, nutrition, fodder production etc, based on existing and new technologies, along with illustrations.
- Features more than 150 full-color photographs -- plus detailed descriptions on each topic.
- Concise, comprehensible structure of the text allows readers to navigate the content with affluence.
- Wide-ranging glossary of key terms provides readers with the precise facts they need to clarity.
