Contents

<i>Preface</i>	<i>v-vi</i>
1. An Introduction	1
History of Organic Farming	1
The Science of Organic Farming	2
Comparing Organic and Conventional Farms	4
Farmers	20
Methods of Organic Farming	26
Standards	30
Economics	30
Externalities	33
Sales and Marketing	36
Capacity Building	37
Critical Analysis	37
Principles of Organic Farming	38
Fundamental Principles and Values	39
Perspectives for the Development of Organic Farming	45
2. The Development and Geographic Distribution of Organic Farming	49
What is organic farming?	49
Organic Growth	50
Rural Decline	54
Pesticide Concerns	62
Organic Certification and National Standards	72
Research and Information	74
Organic Farming Today	77
Conclusion	79
3. The Rejection of Conventional Agricultural Techniques	81
Problems of Early Organic Farms	82
A Half-century of Progress	83
Issues in Organic Research	91
A Future Challenge for Organic Farming Research	93

4. Organic Food Consumers	95
Retail Sales and Supply	97
Rural Geography and Local Food	98
Agri-business Goes Organic	102
An Organic Social Movement	107
Conclusion	111
5. Policies and Markets for Organic Farming	112
Introduction	112
Governmental Support for Organic Farming in Europe	117
The Organic Market	131

Introduction	152
The Paradigm Shifts	153
The Sustainability Issues	154
Opportunities	158
Constraints	163
Conclusions	169
7. Future Landscape	172
Introduction	172
Advocacy	173
Relevant Research	176
Promoting Organic Methods	179
Organic Future	186
Goals	187
Profitability of Small Organic Farming	189
Methods of Organic Farming	191
Plant Nutrition	192
Importance of Organic Farming	194
The Origins of Organic Agriculture	195
8. Biofertilizers and Organic Farming	200
Introduction	200
Application of Biofertilizers	201
The Best Feed for Cattle and Poultry in <i>Anabaena Azollae</i>	202
Important Role of Biofertilizer in Crop Production	212
Critical Factors Responsible for Effectiveness	214
Organic Matter and Soil Fertility	215
Soil inoculants	223
Managing Soil Organic Matter	223
Soil Organic Matter	227
Natural and Living Organic in Fertilizers	235
Form of Agriculture in Organic Farming	267
Bibliography	279
Index	281

HANDBOOK OF ORGANIC FARMING

Organic farming is a method of crop and livestock production that involves much more than choosing not to use pesticides, fertilizers, genetically modified organisms, antibiotics and growth hormones. Organic production is a holistic system designed to optimize the productivity and fitness of diverse communities within the agro-ecosystem, including soil organisms, plants, livestock and people. The principal goal of organic production is to develop enterprises that are sustainable and harmonious with the environment. The book is particularly designed to know that what is organic farming how it is good and how we save our mother earth from hazardous chemical and take care of our health also as now a days what so ever we eat, it may be fruits, vegetables etc are either produced by chemicals or chemical is sprayed on it. In this handy book the author has explained the basics of organic farming.

Contents: An Introduction; The Development and Geographic Distribution of Organic Farming; The Rejection of Conventional Agricultural Techniques; Organic Food Consumers; Policies and Markets for Organic Farming; Opportunities and Constraints; Future Landscape; Biofertilizers and Organic Farming.
