

The background of the book cover features three large, overlapping wireframe spheres. One sphere on the left is yellow, while the others are orange. They are set against a dark blue background with a vertical red band running down the center. The authors' names are printed in white within the red band.

The cover image symbolizes the structure of the text, as a collection of Topics that merge into a unified whole. It also symbolizes the fact that physical chemistry provides a basis for understanding chemical and physical change.

# CONTENTS

Conventions	xxii	TOPIC 2C Thermochemistry	49
List of tables	xxiii	2C.1 Standard enthalpy changes	49
List of <i>The chemist's toolkits</i>	xxv	2C.2 Standard enthalpies of formation	52
List of material provided as <i>A deeper look</i>	xxvi	2C.3 The temperature dependence of reaction enthalpies	53
List of <i>Impacts</i>	xxvii	2C.4 Experimental techniques	54
		Checklist of concepts	55
		Checklist of equations	56
<b>PROLOGUE</b> Energy, temperature, and chemistry	1	TOPIC 2D State functions and exact differentials	57
		2D.1 Exact and inexact differentials	57
<b>FOCUS 1</b> The properties of gases	3	2D.2 Changes in internal energy	58
TOPIC 1A The perfect gas	4	2D.3 Changes in enthalpy	61
1A.1 Variables of state	4	2D.4 The Joule–Thomson effect	62
1A.2 Equations of state	6	Checklist of concepts	64
Checklist of concepts	10	Checklist of equations	64
Checklist of equations	10	TOPIC 2E Adiabatic changes	65
TOPIC 1B The kinetic model	11	2E.1 The change in temperature	65
1B.1 The model	11	2E.2 The change in pressure	66
1B.2 Collisions	17	Checklist of concepts	67
Checklist of concepts	18	Checklist of equations	67
Checklist of equations	18		
TOPIC 1C Real gases	19	<b>FOCUS 3</b> The Second and Third Laws	73
1C.1 Deviations from perfect behaviour	19	TOPIC 3A Entropy	74
1C.2 The van der Waals equation	23	3A.1 The Second Law	74
Checklist of concepts	27	3A.2 The definition of entropy	76
Checklist of equations	27	3A.3 The entropy as a state function	78
		Checklist of concepts	82
<b>FOCUS 2</b> The First Law	31	Checklist of equations	83
TOPIC 2A Internal energy	32	TOPIC 3B Entropy changes accompanying specific processes	84
2A.1 Work, heat, and energy	32	3B.1 Expansion	84
2A.2 The definition of internal energy	35	3B.2 Phase transitions	85
2A.3 Expansion work	36	3B.3 Heating	86
2A.4 Heat transactions	40	3B.4 Composite processes	86
Checklist of concepts	43	Checklist of concepts	87
Checklist of equations	43	Checklist of equations	87
TOPIC 2B Enthalpy	44	TOPIC 3C The measurement of entropy	88
2B.1 The definition of enthalpy	44	3C.1 The calorimetric measurement of entropy	88
2B.2 The variation of enthalpy with temperature	46	3C.2 The Third Law	89
Checklist of concepts	48	Checklist of concepts	92
Checklist of equations	48	Checklist of equations	92

<b>TOPIC 3D</b> Concentrating on the system	93	<b>TOPIC 5D</b> Phase diagrams of binary systems: solids	167
3D.1 The Helmholtz and Gibbs energies	93	5D.1 Eutectics	167
3D.2 Standard molar Gibbs energies	96	5D.2 Reacting systems	168
Checklist of concepts	99	5D.3 Incongruent melting	169
Checklist of equations	99	Checklist of concepts	169
<b>TOPIC 3E</b> Combining the First and Second Laws	100	<b>TOPIC 5E</b> Phase diagrams of ternary systems	170
3E.1 Properties of the internal energy	100	5E.1 Triangular phase diagrams	170
3E.2 Properties of the Gibbs energy	102	5E.2 Ternary systems	171
Checklist of concepts	106	Checklist of concepts	172
Checklist of equations	106	<b>TOPIC 5F</b> Activities	173
<b>FOCUS 4</b> Physical transformations of pure substances	111	5F.1 The solvent activity	173
<b>TOPIC 4A</b> Phase diagrams of pure substances	112	5F.2 The solute activity	173
4A.1 The stabilities of phases	112	5F.3 The activities of regular solutions	175
4A.2 Phase boundaries	114	5F.4 The activities of ions	177
4A.3 Three representative phase diagrams	117	Checklist of concepts	179
Checklist of concepts	119	Checklist of equations	180
Checklist of equations	119	<b>FOCUS 6</b> Chemical equilibrium	189
<b>TOPIC 4B</b> Thermodynamic aspects of phase transitions	120	<b>TOPIC 6A</b> The equilibrium constant	190
4B.1 The dependence of stability on the conditions	120	6A.1 The Gibbs energy minimum	190
4B.2 The location of phase boundaries	123	6A.2 The description of equilibrium	191
Checklist of concepts	126	Checklist of concepts	197
Checklist of equations	126	Checklist of equations	197
<b>FOCUS 5</b> Simple mixtures	131	<b>TOPIC 6B</b> The response of equilibria to the conditions	198
<b>TOPIC 5A</b> The thermodynamic description of mixtures	133	6B.1 The response to pressure	198
5A.1 Partial molar quantities	133	6B.2 The response to temperature	199
5A.2 The thermodynamics of mixing	137	Checklist of concepts	202
5A.3 The chemical potentials of liquids	140	Checklist of equations	202
Checklist of concepts	143	<b>TOPIC 6C</b> Electrochemical cells	203
Checklist of equations	144	6C.1 Half-reactions and electrodes	203
<b>TOPIC 5B</b> The properties of solutions	145	6C.2 Varieties of cells	204
5B.1 Liquid mixtures	145	6C.3 The cell potential	205
5B.2 Colligative properties	148	6C.4 The determination of thermodynamic functions	207
Checklist of concepts	154	Checklist of concepts	209
Checklist of equations	155	Checklist of equations	209
<b>TOPIC 5C</b> Phase diagrams of binary systems: liquids	156	<b>TOPIC 6D</b> Electrode potentials	210
5C.1 Vapour pressure diagrams	156	6D.1 Standard potentials	210
5C.2 Temperature-composition diagrams	158	6D.2 Applications of standard potentials	212
5C.3 Distillation	160	Checklist of concepts	213
5C.4 Liquid-liquid phase diagrams	162	Checklist of equations	214
Checklist of concepts	166	<b>FOCUS 7</b> Quantum theory	221
Checklist of equations	166	<b>TOPIC 7A</b> The origins of quantum mechanics	223
		7A.1 Energy quantization	223

7A.2 Wave-particle duality	228	TOPIC 8C Atomic spectra	307
Checklist of concepts	231	8C.1 The spectra of hydrogenic atoms	307
Checklist of equations	231	8C.2 The spectra of many-electron atoms	308
TOPIC 7B Wavefunctions	232	Checklist of concepts	316
7B.1 The Schrödinger equation	232	Checklist of equations	316
7B.2 The Born interpretation	233		
Checklist of concepts	236	FOCUS 9 Molecular structure	321
Checklist of equations	236	PROLOGUE The Born-Oppenheimer approximation	323
TOPIC 7C Operators and observables	237	TOPIC 9A Valence-bond theory	324
7C.1 Operators	237	9A.1 Diatomic molecules	324
7C.2 Superpositions and expectation values	241	9A.2 Resonance	326
7C.3 The uncertainty principle	243	9A.3 Polyatomic molecules	326
7C.4 The postulates of quantum mechanics	245	Checklist of concepts	330
Checklist of concepts	246	Checklist of equations	330
Checklist of equations	246	TOPIC 9B Molecular orbital theory: the hydrogen molecule-ion	331
TOPIC 7D Translational motion	247	9B.1 Linear combinations of atomic orbitals	331
7D.1 Free motion in one dimension	247	9B.2 Orbital notation	336
7D.2 Confined motion in one dimension	248	Checklist of concepts	336
7D.3 Confined motion in two and more dimensions	252	Checklist of equations	336
7D.4 Tunnelling	254	TOPIC 9C Molecular orbital theory: homonuclear diatomic molecules	337
Checklist of concepts	257	9C.1 Electron configurations	337
Checklist of equations	258	9C.2 Photoelectron spectroscopy	342
TOPIC 7E Vibrational motion	259	Checklist of concepts	343
7E.1 The harmonic oscillator	259	Checklist of equations	344
7E.2 Properties of the harmonic oscillator	263	TOPIC 9D Molecular orbital theory: heteronuclear diatomic molecules	345
Checklist of concepts	265	9D.1 Polar bonds and electronegativity	345
Checklist of equations	266	9D.2 The variation principle	346
TOPIC 7F Rotational motion	267	Checklist of concepts	350
7F.1 Rotation in two dimensions	267	Checklist of equations	350
7F.2 Rotation in three dimensions	271	TOPIC 9E Molecular orbital theory: polyatomic molecules	351
Checklist of concepts	276	9E.1 The Hückel approximation	351
Checklist of equations	276	9E.2 Applications	355
FOCUS 8 Atomic structure and spectra	283	9E.3 Computational chemistry	357
TOPIC 8A Hydrogenic atoms	284	Checklist of concepts	360
8A.1 The structure of hydrogenic atoms	284	Checklist of equations	360
8A.2 Atomic orbitals and their energies	288		
Checklist of concepts	294	FOCUS 10 Molecular symmetry	365
Checklist of equations	295	TOPIC 10A Shape and symmetry	366
TOPIC 8B Many-electron atoms	296	10A.1 Symmetry operations and symmetry elements	366
8B.1 The orbital approximation	296	10A.2 The symmetry classification of molecules	368
8B.2 The Pauli exclusion principle	297	10A.3 Some immediate consequences of symmetry	372
8B.3 The building-up principle	299	Checklist of concepts	373
8B.4 Self-consistent field orbitals	305	Checklist of operations and elements	374
Checklist of concepts	305		
Checklist of equations	306		

<b>TOPIC 10B</b> Group theory	375	<b>11E.2</b> Symmetry of vibrational wavefunctions	433
10B.1 The elements of group theory	375	Checklist of concepts	434
10B.2 Matrix representations	376	<b>TOPIC 11F</b> Electronic spectra	435
10B.3 Character tables	379	11F.1 Diatomic molecules	435
Checklist of concepts	383	11F.2 Polyatomic molecules	442
Checklist of equations	383	Checklist of concepts	445
<b>TOPIC 10C</b> Applications of symmetry	384	Checklist of equations	445
10C.1 Vanishing integrals	384	<b>TOPIC 11G</b> Decay of excited states	446
10C.2 Applications to molecular orbital theory	387	11G.1 Fluorescence and phosphorescence	446
10C.3 Selection rules	389	11G.2 Dissociation and predissociation	448
Checklist of concepts	389	11G.3 Lasers	449
Checklist of equations	389	Checklist of concepts	450
<b>FOCUS 11</b> Molecular spectroscopy	393	<b>FOCUS 12</b> Statistical thermodynamics	459
<b>TOPIC 11A</b> General features of molecular spectroscopy	395	<b>TOPIC 12A</b> The Boltzmann distribution	460
11A.1 The absorption and emission of radiation	396	12A.1 Configurations and weights	460
11A.2 Spectral linewidths	399	12A.2 The relative population of states	464
11A.3 Experimental techniques	401	Checklist of concepts	464
Checklist of concepts	405	Checklist of equations	465
Checklist of equations	405	<b>TOPIC 12B</b> Molecular partition functions	466
<b>TOPIC 11B</b> Rotational spectroscopy	406	12B.1 The significance of the partition function	466
11B.1 Rotational energy levels	406	12B.2 Contributions to the partition function	468
11B.2 Microwave spectroscopy	411	Checklist of concepts	476
11B.3 Rotational Raman spectroscopy	413	Checklist of equations	476
11B.4 Nuclear statistics and rotational states	415	<b>TOPIC 12C</b> Molecular energies	477
Checklist of concepts	417	12C.1 The basic equations	477
Checklist of equations	417	12C.2 Contributions of the fundamental modes of motion	478
<b>TOPIC 11C</b> Vibrational spectroscopy of diatomic molecules	418	Checklist of concepts	481
11C.1 Vibrational motion	418	Checklist of equations	481
11C.2 Infrared spectroscopy	419	<b>TOPIC 12D</b> The canonical ensemble	482
11C.3 Anharmonicity	420	12D.1 The concept of ensemble	482
11C.4 Vibration-rotation spectra	422	12D.2 The mean energy of a system	484
11C.5 Vibrational Raman spectra	424	12D.3 Independent molecules revisited	484
Checklist of concepts	425	12D.4 The variation of the energy with volume	485
Checklist of equations	426	Checklist of concepts	486
<b>TOPIC 11D</b> Vibrational spectroscopy of polyatomic molecules	427	Checklist of equations	486
11D.1 Normal modes	427	<b>TOPIC 12E</b> The internal energy and the entropy	487
11D.2 Infrared absorption spectra	428	12E.1 The internal energy	487
11D.3 Vibrational Raman spectra	429	12E.2 The entropy	489
Checklist of concepts	430	Checklist of concepts	494
Checklist of equations	430	Checklist of equations	494
<b>TOPIC 11E</b> Symmetry analysis of vibrational spectra	431	<b>TOPIC 12F</b> Derived functions	495
11E.1 Classification of normal modes according to symmetry	431	12F.1 The derivations	495
		12F.2 Equilibrium constants	498
		Checklist of concepts	501
		Checklist of equations	501

<b>FOCUS 13</b> Molecules in motion	507	14E.4 The rate-determining step	565
<b>TOPIC 13A</b> Transport properties of a perfect gas	508	14E.5 Pre-equilibria	566
13A.1 The phenomenological equations	508	14E.6 Kinetic and thermodynamic control of reactions	568
13A.2 The transport parameters	510	Checklist of concepts	568
Checklist of concepts	515	Checklist of equations	568
Checklist of equations	516	<b>TOPIC 14F</b> Examples of reaction mechanisms	569
<b>TOPIC 13B</b> Motion in liquids	517	14F.1 Unimolecular reactions	569
13B.1 Experimental results	517	14F.2 Polymerization kinetics	570
13B.2 The mobilities of ions	519	14F.3 Enzyme-catalysed reactions	574
Checklist of concepts	523	Checklist of concepts	577
Checklist of equations	523	Checklist of equations	577
<b>TOPIC 13C</b> Diffusion	524	<b>TOPIC 14G</b> Photochemistry	578
13C.1 The thermodynamic view	524	14G.1 Photochemical processes	578
13C.2 The diffusion equation	526	14G.2 The primary quantum yield	579
13C.3 The statistical view	530	14G.3 Mechanism of decay of excited singlet states	580
Checklist of concepts	531	14G.4 Quenching	581
Checklist of equations	532	14G.5 Resonance energy transfer	583
<b>FOCUS 14</b> Chemical kinetics	537	Checklist of concepts	584
<b>TOPIC 14A</b> The rates of chemical reactions	539	Checklist of equations	584
14A.1 Monitoring the progress of a reaction	539	<b>FOCUS 15</b> Reaction dynamics	591
14A.2 The rates of reactions	541	<b>TOPIC 15A</b> Collision theory	592
Checklist of concepts	545	15A.1 Reactive encounters	592
Checklist of equations	546	15A.2 The RRK model	597
<b>TOPIC 14B</b> Integrated rate laws	547	Checklist of concepts	598
14B.1 Zeroth-order reactions	547	Checklist of equations	598
14B.2 First-order reactions	547	<b>TOPIC 15B</b> Diffusion-controlled reactions	599
14B.3 Second-order reactions	549	15B.1 Reactions in solution	599
Checklist of concepts	552	15B.2 The material-balance equation	601
Checklist of equations	552	Checklist of concepts	602
<b>TOPIC 14C</b> Reactions approaching equilibrium	553	Checklist of equations	603
14C.1 First-order reactions approaching equilibrium	553	<b>TOPIC 15C</b> Transition-state theory	604
14C.2 Relaxation methods	554	15C.1 The Eyring equation	604
Checklist of concepts	556	15C.2 Thermodynamic aspects	607
Checklist of equations	556	15C.3 The kinetic isotope effect	610
<b>TOPIC 14D</b> The Arrhenius equation	557	Checklist of concepts	612
14D.1 The temperature dependence of reaction rates	557	Checklist of equations	612
14D.2 The interpretation of the Arrhenius parameters	558	<b>TOPIC 15D</b> The dynamics of molecular collisions	613
Checklist of concepts	561	15D.1 Molecular beams	613
Checklist of equations	561	15D.2 Reactive collisions	616
<b>TOPIC 14E</b> Reaction mechanisms	562	15D.3 Potential energy surfaces	617
14E.1 Elementary reactions	562	15D.4 Some results from experiments and calculations	618
14E.2 Consecutive elementary reactions	563	Checklist of concepts	621
14E.3 The steady-state approximation	564	Checklist of equations	621

<b>TOPIC 15E</b> Electron transfer in homogeneous systems	622	Checklist of concepts	691
15E.1 The rate law	622	Checklist of equations	691
15E.2 The role of electron tunnelling	623	<b>TOPIC 17C</b> Liquids	692
15E.3 The rate constant	624	17C.1 Molecular interactions in liquids	692
15E.4 Experimental tests of the theory	625	17C.2 The liquid-vapour interface	695

Checklist of equations	783	4 Character tables	845
<b>TOPIC 19B Adsorption and desorption</b>	<b>784</b>	<b>Index</b>	<b>849</b>
19B.1 Adsorption isotherms	784		

## Authoritative. Supportive. Complete.

This International Edition of *Atkins' Physical Chemistry* has been carefully developed to provide the information, explanation, and guidance you need to master the subject.

### Authoritative:

- *Atkins' Physical Chemistry* is widely acknowledged by students and lecturers around the globe to be the textbook of choice for studying physical chemistry.

### Supportive:

- The text has been organized into discrete Topics, breaking down material to help you build confidence, and grouped into overarching Focuses, to show you the bigger picture.

### Extensive mathematical support includes:

- detailed annotations of mathematical derivations, broken into clear steps with signposted 'physical interpretation' sections;

- a 'How is that done?' feature to emphasize the power of mathematics for making progress with a question that has arisen;
- 'Chemist's toolkits', which provide you with succinct reminders of mathematical concepts and techniques right where you need them.

### Complete:

- This international edition covers the full breadth of the physical chemistry curriculum, spanning thermodynamics, quantum theory, structure, chemical kinetics, and reaction dynamics.

### online resource centre

[www.oup.com/uk/pchem11exe/](http://www.oup.com/uk/pchem11exe/)

### For students:

- *Impact* sections show the application of physical chemistry in a diverse range of modern contexts
- Expanded *Chemist's toolkits* detail the mathematical concepts that you need to understand in order to master physical chemistry, and provide examples
- A *deeper look* sections extend some of the material presented in the text, and provide details of more advanced calculations

- Group theory tables
- Molecular modelling problems
- Chapter-specific problems
- *Student's Solutions Manual*

### For registered adopters:

- Figures and tables from the book
- Tables of editable key equations
- *Instructor's Solutions Manual*

Peter Atkins, Fellow of Lincoln College, University of Oxford, Oxford, UK

Julio de Paula, Professor of Chemistry, Lewis & Clark College, Portland, Oregon, USA

James Keeler, Senior Lecturer in Chemistry and Fellow of Selwyn College, University of Cambridge, Cambridge, UK

This version of the text has been modified. Not for sale in the UK, Europe, North America, the Middle East, Australia and New Zealand, Japan, and the Caribbean.
