TABLE OF CONTENTS

Preface.....	ix
Chapter 1 The Owners' Perspective.....	1
1.1 Project Life Cycle.....	1
Definition.....	2
Phases of Project Life Cycles.....	4
1.2 Types of Construction.....	6
Definition.....	6
Residential Housing Construction.....	7
Institutional and Commercial Building Construction.....	9
Specialized Industrial Construction.....	10
Infrastructure and Heavy Construction.....	10
1.3 Selection of Professional Services.....	11
Definition.....	11
Financial Planning Consultants.....	12
Architectural and Engineering Firms.....	12
Design/Construct Firms.....	14
Professional Construction Managers.....	14
Operation and Maintenance Managers.....	15
Facilities Management.....	15
1.4 Construction Contractors and Facilities.....	17
Definition.....	17
Financing of Constructed Facilities.....	22
1.5 Legal and Regulatory Requirements.....	26
Definition.....	26
Legal Responsibilities.....	27
Mitigation of Conflicts.....	27
Government Regulation.....	27
1.6 Changing Environment of the Construction Industry.....	29
Definition.....	29
New Technologies.....	31
Labor Productivity.....	32
Public Scrutiny.....	32
Contractor Financed Projects.....	33
Lean Construction.....	34
1.7 The Role of Project Managers.....	35
Definition.....	35
The Role.....	37

	Responsibilities	37
	Summary	41
	Knowledge Check.....	41
	Review Questions.....	43
	References	44
Chapter 2	Organizing for Project Management	49
2.1	Project Management	49
	Definition.....	50
	The Project Manager	52
	Construction Project Management	54
	Construction Project Management Basics.....	55
	Project Management: Principles and Process.....	57
	Trends in Modern Management.....	58
	Strategic Planning and Project Programming.....	61
2.2	Effects of Project Risks on Organization	64
	Definition.....	64
	Construction Project Management Stage	67
	Cost, Budget and Finance in Construction Management.....	70
	Organizing and Scheduling a Construction Project	72
	Organization of Project Participants	74
	Matrix Organization of an Engineering Division.....	77
	Construction Management Consultant Organization	77
	The Fully Incorporated Organization.....	78
2.3	Traditional Designer-Constructor Sequence	80
	Definition.....	80
	Traditional Procurement Arrangement	82
	Functions of Project Management	83
2.4	Professional Construction Management.....	88
	Definition.....	88
	Professional Construction Management Arrangement.....	89
2.5	Owner-Builder Operation	92
	Definition.....	92
	Turnkey Operation	93
	Turnkey Project Arrangement	93
	Leadership and Motivation for the Project Team	94
2.6	Interpersonal Behavior in Project Organizations.....	96
	Definition.....	96
	Interpersonal Behavior within the Organization	97
	Perceptions of Owners and Contractors.....	98
	Summary	103
	Knowledge check	104

Review Questions.....	105
References.....	106
Chapter 3 Design and Construction Process.....	111
3.1 Design and Construction as an Integrated System.....	111
Definition.....	112
Innovation and Technological Feasibility	113
Innovation and Economic Feasibility	116
3.2 Design Methodology.....	119
Definition.....	119
Construction Site Environment	125
3.3 Value Engineering	128
Definition.....	128
Construction Planning.....	129
Industrialized Construction and Pre-fabrication.....	131
Pre-Project Planning.....	133
Summary	138
Knowledge check	138
Review Questions.....	139
References.....	140
Chapter 4 Labour, Material Utilization.....	143
4.1 Historical Perspective.....	143
Definition.....	144
Labor Productivity	145
Factors Affecting Job-Site Productivity	152
Labor Relations in Construction	158
Collective Bargaining.....	160
4.2 Materials Management.....	166
Definition.....	166
Material Procurement and Delivery.....	171
Inventory Control	174
Tradeoffs of Costs in Materials Management.....	179
Summary	184
Review Questions.....	184
Knowledge Check.....	185
References.....	186
Chapter 5 Equipment Utilization	191
5.1 Construction Equipment.....	191
Definition.....	192
Type of Equipment	193

5.2	Choice of Equipment and Standard Production Rates	208
	Definition.....	208
	Queues and Resource Bottlenecks	212
	Construction Process.....	217
	Summary	223
	Knowledge Check.....	223
	Review Questions.....	224
	References.....	226
Chapter 6	Cost Estimation	229
6.1	Costs associated with Constructed Facilities	229
	Definition.....	230
	Approaches to Cost Estimation	232
	Type of Construction Cost Estimates	234
6.2	Effects of Scale on Construction Cost.....	240
	Definition.....	241
6.3	Unit Cost Method of Estimation.....	247
	Definition.....	247
	Simple Unit Cost Formula	249
	Factored Estimate Formula.....	249
	Formula Based on Labor, Material and Equipment.....	250
6.4	Methods for Allocation of Joint Costs.....	252
	Definition.....	252
	Physical Measurement Method.....	253
	Relative Sales Value Method.....	253
	Net Realizable Value (NRV) method.....	253
6.5	Historical Cost Data	257
	Definition.....	257
6.6	Cost Indices	259
	Definition.....	259
	Applications of Cost Indices to Estimating	263
6.7	Estimate based on Engineer's List of Quantities.....	265
	Definition.....	265
	Estimation of Operating Costs	268
	Summary	272
	Knowledge Check.....	272
	Review Questions.....	273
	References.....	274
	INDEX	277

Level: Beginner to Advanced
Subject: Business and Management

Theory, Practice and Techniques in Construction Management

Construction projects are tarnished for being over-budget, late and saddled with scope creep, as well as for poor communication protocols and inadequate controls around scope change management. It is energetic that a construction project manager takes a proactive approach from the moment of his or her appointment. Project management plans, even for relatively modest construction projects, should exhibit a level of detail greater than might be deemed appropriate for other types of projects of equivalent cost and duration. The management of construction projects requires knowledge of modern management as well as an understanding of the design and construction process. Construction projects have a specific set of objectives and constraints such as a required time frame for completion. While the relevant technology, institutional arrangements or processes will differ, the management of such projects has much in common with the management of similar types of projects in other specialty or technology domains such as aerospace, pharmaceutical and energy developments.

"Theory, Practice and Techniques in Construction Management" offers wide ranging and comprehensive coverage of all facets of construction engineering and project management. It provides a comprehensive understanding of when, where, and how to use the most effective project management resources. This comprehensive book's logical, well-structured format follows the natural sequence of a construction project. It looks at management principles and techniques applied to the day-to-day problems facing a business in the construction industry. The each chapter contains specific key notes, learning objectives, comprehensive indicative content, tables, and illustrations together with the topic areas.
