Type Setting by : Friends Media, Delhi-110089

Digitally Printed at : Replika Press Pvt. Ltd.

Contents

<i>Preface</i>	<i>v-vi</i>
----------------------	-------------

1. Air Quality Standards	1
Sulphur Dioxide	1
Carbon Monoxide	1
Nitrogen Oxide	2
Air Pollution Effects	3
Prevention and Control of Air Pollution	9
Meteorology and Air Quality	13
Atmospheric Stability and Instability	13
Emission Standard	18
2. Natural Air Pollution	24
Top-ten Gases in Air Pollution	25
Industrial Plants and Factories	29
Agricultural Effects	31
Indoor Air Pollution	34
Indoor Air Pollution in Developing Nations	37
Sources and Effects of Common Air Pollutants	44
Air Pollution in Developing Countries	47
Regional Air Pollution	51
3. Air Quality Regulations	57
Introduction.....	57
4. Monitoring Air Pollution	68
Ozone Monitoring	70
Ambient Air Monitoring	72
Environmental Pollution, Its Sources and Effects	77
5. The Atmosphere.....	83
Urban Atmospheres	83
Origin of the Oceans and Atmosphere	83
Atmospheric Instability	87

Lapse Rates and Atmospheric Stability	92
Troposphere and Stratosphere	100
Types of Structure in the Atmosphere	113
6. Sources of Air Pollution and Its Effects.....	136
Pollutants	144
Sources of Air Pollution in Industry	146
Primary Pollutants	152
Air Pollution Chemistry	153
Photochemical Smog	158
7. Impacts of Acid Rain	161
Acid Deposition	164
Prevention Methods	166
Acid Deposition	167
Measuring Acid Rain	174
8. Gaseous Pollutants	183
Introduction	183
Sizes and Sources of Particulate Matter	184
Nitrogen Oxides	185
Particulate Pollutants	187
9. Applying Pollution Control Technologies	198
Waste Management and Pollution Control	200
Impact of Man's Activities in Pollutants	207
Contaminated Wetlands	208
Human Impact on the Natural Environment	210
10. Air Quality and Human Health	215
Human Health	215
Indoor Air Pollution	216
Tornadoes and Waterspouts	218
11. Air Pollution Monitoring	231
Role of Software in Pollution and Emissions Monitoring and Control	239
Pollution Through Agricultural Wastes	244
Chemical Pollutants	247
Transboundary Pollution	252
12. Air Quality Modelling	278
Natural Cleaning Process of Atmosphere	290
Atmospheric Dispersion Modeling	293
<i>Bibliography</i>	299
<i>Index</i>	301

AIR QUALITY

MEASUREMENT ANALYSIS AND MONITORING TECHNIQUES

Air quality measurement, analysis and monitoring are therefore essential for controlling air quality degradation and measuring the degree of damage. Air quality is monitored by measuring the air pollutant concentrations using specialized equipment and methods. High quality air pollution data is needed by air regulators and managers to implement the National Ambient Air Quality Standards and develop effective preventive and mitigation strategies to protect air quality. Understanding what is in the air near sources of pollution such as industrial applications, oil and gas production facilities, coal-fired power plants and highways is critical to safeguard public health and the environment from six common air pollutants and other hazardous air pollutants. Air pollution occurs when the air contains gases, dust, fumes or odour in harmful amount. That is, amounts which could be harmful to the health or comfort of humans and animals or which could cause damage to plants and materials. The substances that cause air pollution are called pollutants. Pollutants that are pumped into our atmosphere and directly pollute the air are called primary pollutants. Primary pollutant examples include carbon monoxide from car exhausts and sulfur dioxide from the combustion of coal. The book also contains revised discussions on public policy concerns, with a focus on air quality standards for ozone depletion and global warming, and the health effects of particulate air pollutants.

Contents: 1. Air Quality Standards, 2. Natural Air Pollution, 3. Air Quality Regulations, 4. Monitoring Air Pollution, 5. The Atmosphere, 6. Sources of Air Pollution and Its Effects, 7. Impacts of Acid Rain, 8. Gaseous Pollutants, 9. Applying Pollution Control Technologies, 10. Air Quality and Human Health, 11. Air Pollution Monitoring, 12. Air Quality Modelling.

About the Author

Dr. Arvind Kumar got his Ph.D Degree in Biotechnology from the C.C.S. University U.P., India. He has worked on several positions at the other university: Chief Scientist in R&D Patanjali Ayurved, Haridwar; Officer on Special Duty/Chief Scientist State Forensic Officer cum (Director) in-charge, State Forensic Science Laboratory in Port Blair, A&N Islands and Forensic Scientist ub District Mobile Forensic Science Laboratory Haridwar, Uttrakhand. Dr. Arvind Kumar having specialized in diverse fields, such as, Plant Biotechnologist (Development of formulation for Anti Cancers and Anti HIV drugs from Plant Lectins and Plant Toxins). He has written four books and numerous research papers and popular articles in national and international journals and magazines. Dr. Arvind Kumar has also received the three awards, such as, (1) Received Best Scientific paper by Directorate of Forensic Science, Ministry of Home Affairs, Government of India for year 2004. "For the development of technique for the detection of plant toxins"; (2) Received Best Scientific paper by Directorate of Forensic Science, Ministry of Home Affairs, and Government of India for year 2005. "For the in-vivo study of the plant lectins"; and (3) Nominated for the Emerging Young Forensic Scientist Award in 57th Annual meeting of AAFS at New Orleans, USA. "For the development of new complimentary technique for the determination of Toxins and Alkaloids from plant".
