ABSTRACT

AVELIDA, ANNE KRISHNA R. Raising Hog Enterprise in Asis 1, Mendez, Cavite: An Entrepreneurial Development Project Report. Bachelor in Agricultural Entrepreneurship major in Animal Production. Cavite State University, Indang, Cavite. June 2019 Adviser: Mr. Noriel Bergonio.

This project was conducted at Barangay Asis 1, Mendez, Cavite from December 20, 2018 to April 3, 2019 to: (1) gain knowledge and understanding in swine production, (2) evaluate the different problems related to swine raising and (3) gain profit from fattening hogs.

The four hogs were provided with proper care and management during 104 days – rearing period. At the end of the production, the hogs with an average initial body weight of 18 kg ended up weighing an average final weight of 88 kg. After 104 days of rearing, the hogs attained an average daily gain of 673.08 g, feed consumption of 200 kg and feed conversion efficiency of 2.86.

A total of P 39,246.6 was used in the production. The total gross sales of the production was P 44,525. The net income was P 5,278, giving a return on investment (ROI) of 13.45 percent.

RAISING HOG ENTERPRISE IN ASIS 1, MENDEZ, CAVITE AN ENTERPRENEURIAL DEVELOPMENT PROJECT

Anne Krishna R. Avelida

An entrepreneurial development project report submitted to the faculty of the College of Agriculture, Food, Environment and Natural Resources, Cavite State University, Indang, Cavite in partial fulfillment of the requirements for the degree of Bachelor in Agricultural Entrepreneurship major in Animal Production with Contribution No. EDP 2019-74. Prepared under the supervision of Mr. Noriel Bergonio.

INTRODUCTION

Swine raising is an old backyard business in the Philippines. Currently about 70 percent of the swine industry is composed of small raiser or backyard raisers. It only shows how Filipinos love to eat pork; and swine raising is a good business to invest in (Chen, 2011). Swine production provides a substantial foundation on pig husbandry, biology and production with an emphasis on learning all the requirements to manage the practical daily needs of pigs (Taen, 2004).

The project can provide good source of meat, and it can provide a great deal of income. This project can also develop the entrepreneurial skills of student. Hog raising enterprise is advantageous because it has fast growth rates and prolific breeding potentials. It is also relatively easy to raise, it does not require much space.
