ABSTRACT

DALAGAN, MARVIC M. and SARMIENTO, JAYSON C. Online Job Searching for Cavite State University Main Campus. Undergraduate Thesis. Bachelor of Science in Information Technology. Cavite State University, Indang, Cavite. April 2014. Adviser: Mr. Simeon Daez.

The system entitled, "Online Job Searching for Cavite State University - Main Campus" was conducted to help graduating students lessen their time in looking for a job and the Office of Student Affairs (OSA) to assist them find a job through linkage institutions trusted by the university. With the help of the system, graduating students will save time in going to different places finding a job without any assurance to be hired. Using the website, they will have a big chance to be hired because the system is created exclusively for graduating students of Cavite State University - Main Campus.

System Development was used as methodology of the software. It has seven process workflows, namely: analyze/planning; breakdown priority project; design module; code–test/debug; integration of sub procedures; integration with the existing system; and test/implementation.

The software was developed using Microsoft Word 2010 for documentation, RedKoda for drawing structured diagrams; HTML and CSS for web design, XAMPP (cross-platform Apache) for Internet server; MySQL 5.5 for database and PHP, and JavaScript and jQuery (JavaScript library) for the flexibility of the program.

ONLINE JOB SEARCHING FOR CAVITE STATE UNIVERSITY – MAIN CAMPUS

Marvic M. Dalagan
Jayson C. Sarmiento

An undergraduate thesis manuscript submitted to the faculty of the Department of Information Technology, College of Engineering and Information Technology, Cavite State University, Indang, Cavite in partial fulfillment of the requirements for the degree of Bachelor of Science in Information Technology with Contribution No. CEIT–2013–14-128. Prepared under the supervision of Mr. Simeon Daez

INTRODUCTION

Online Job Searching is an act of looking for employment, due to unemployment with a current position. Job searching is an easier and faster way for graduating students to find a job based on their specialty.

As of now, many students who graduated really find it hard to look for a stable job or at least work. Thus, an alternative solution for this problem should be thought of. A system that will help students who graduated at Cavite State University (CvSU) Main Campus will be designed for them to easily find a job using online job searching. With the use of this system, students who graduated job openings of companies.

This system will only help graduates of CvSU - Main Campus to search for a company that best fit their qualification. To help graduating students find a work after graduation, they do not need to go to other places to look for work based on their specialties.
