The Author	

The Book

An Outcome-based Reviewer on Industrial Security Management provides a ready reference and review material to students, as well as law enforcement officers and practitioners. It contains notes that briefly explain key concepts in industrial security management. Moreover, it is formatted as a multiple-choice question (MCQ)-type reviewer to help students easily recall concepts that they have previously learned. This book is designed to not only add to the wealth of resource materials in the field of Criminology but also simulate the Criminologist Licensure Examination to help board examinees improve their chance at acing and passing their tests.

Excello™ is a continuously expanding aggregation of high-quality learning assessments designed to help students master the Philippine curriculum's key skills and provide teachers with easy-to-use test creation tools.
