TABLE OF CONTENTS

Preface.....	ix
Chapter 1 Introduction to Cell Biology.....	1
1.1 Overview of Cell.....	1
Definition.....	2
Cell Theory.....	2
History of Cell Biology	3
1.2 Properties of Cells	5
Importance.....	5
Cells Are Highly Complex and Organized.....	6
Cells Possess a Genetic Program and the Means to Use It.....	8
Cells Are Capable of Producing More of Themselves	8
Cells Acquire and Utilize Energy	9
1.3 Cell Structure and Functions	10
Structure	10
Prokaryotic Cells.....	12
Eukaryotic Cells	14
Eukaryotic cells vs. Prokaryotic cells	25
Comparison Chart.....	26
Differences between Eukaryotic and Prokaryotic Cells	27
Summary	31
Knowledge Check.....	31
Review Questions.....	32
References	33
Chapter 2 DNA Structure and Genetic Code.....	35
2.1 Structure of DNA	35
Definition.....	36
DNA Shape and Structure	36
DNA Replication.....	37
DNA Translation.....	40
DNA Mutation	41
DNA Modeling	41
DNA as the Genetic Material	42
Packaging of DNA Molecules into Chromosomes.....	42
2.2 Genetic Code.....	46
Meaning.....	46
Genetic Code: Codons	47

Protein Production	48
Genetic Code: Mutations	49
Types of Genetic Code	49
Properties of Genetic Code	51
Exceptions of Genetic Code	54
Summary	58
Knowledge Check.....	58
Review Questions.....	59
References.....	60
Chapter 3 Protein Structure and Function.....	63
3.1 Protein	63
Definition.....	64
Polymers of Amino Acids	64
Other Amino Acids Are Found In Nature	72
3.2 Protein Structure	74
Definition.....	74
Primary Structure of Proteins.....	74
Weak Noncovalent Bonds.....	80
Secondary Structures.....	86
Tertiary Structure: Domains and Motifs.....	91
Quaternary Structure: Assemblies of Protein Subunits.....	94
Summary	98
Knowledge Check.....	98
Review Questions.....	99
References	100
Chapter 4 Membrane Structure and Function.....	103
4.1 Plasma Membrane	103
Definition.....	104
Structure of Plasma Membranes	105
Chemical Nature of Membranes.....	106
Modifications of Cell Membrane	109
Functions of Cell Membranes.....	112
4.2 Membrane Transport	114
Overview	114
Transport of Water.....	115
Transport of Ions and Small Molecules	115
Transport of Solid Particles (Bulk Transport)	120
Summary	124
Knowledge Check.....	124
Review Questions.....	125
References	126

Chapter 5	Cellular Adhesion and the Extracellular Matrix.....	131
5.1	Cell Adhesion.....	131
Definition.....	132	
Anchoring Junctions.....	133	
Cell-Matrix Receptors.....	135	
Types of Cell-matrix Receptors	136	
Cell-Adhesion Molecules	136	
5.2	Extracellular Matrix	138
Definition.....	138	
Types of Extracellular Matrix:	140	
Extracellular Matrix on Cell Surface Receptors	149	
Summary	157	
Knowledge Check.....	157	
Review Questions.....	158	
References.....	159	
Chapter 6	Cytoskeleton and Cell Motility.....	165
6.1	Cytoskeleton	165
Definition.....	166	
Meaning of Cytoskeleton.....	167	
Components of Cytoskeleton.....	167	
Microtubules.....	168	
Cytoskeleton-Based Cellular Structures	173	
6.2	Molecular Motors.....	175
Definition.....	175	
Motor Mechanochemistry	177	
Cellular Functions	182	
6.3	Cell Motility	189
Definition.....	189	
Cellular Swimming.....	191	
Cell Crawling	193	
Extensions of Cell Motility.....	194	
Summary	198	
Knowledge Check.....	198	
Review Questions.....	199	
References	200	
Chapter 7	Cellular Communication	205
7.1	The Basic Elements of Cell Signaling Systems.....	205
Basic System	206	
Extracellular Messengers and Their Receptors.....	210	
Types of Cell Signaling	212	

7.2	G Protein-Coupled Receptors.....	214
	Meaning.....	214
	Signal Transduction by G Protein-Coupled Receptors	216
	Initiating the Intracellular Signal.....	220
	Amplifying the Signal: Protein Kinase Cascades	223
7.3	Cell surface proteins mediate cell-cell interactions.....	227
	The Expression of Cell Identity	227
	Intercellular Adhesion	228
	Anchoring Junctions	231
	Communicating Junctions	234
	Summary	239
	Knowledge Check.....	239
	Review Questions.....	240
	References.....	241
Chapter 8	Cell Cycle and Cell Division.....	243
8.1	Cell Cycle	243
	Definition.....	244
	Cell Cycles in Vivo	246
	Control of the Cell Cycle.....	247
8.2	M Phase: Mitosis and Cytokinesis.....	249
	Meaning.....	249
	Prophase	251
	Prometaphase	255
	Metaphase	259
	Anaphase	261
	Telophase.....	262
	Cytokinesis.....	262
8.3	Meiosis	264
	Definition.....	264
	The Stages of Meiosis	270
	Cell Death.....	271
	Summary	276
	Knowledge Check.....	276
	Review Questions.....	277
	References.....	278
	INDEX.....	281

Theory, Practice and Techniques in Cell Biology

Both living and non-living things are composed of molecules made from chemical elements such as Carbon, Hydrogen, Oxygen, and Nitrogen. The organization of these molecules into cells is one feature that distinguishes living things from all other matter. Cells are the basic building blocks of all living things. The human body is composed of trillions of cells. They provide structure for the body, take in nutrients from food, convert those nutrients into energy, and carry out specialized functions. Cells also contain the body's hereditary material and can make copies of themselves. Cells have many parts, each with a different function. Some of these parts, called organelles, are specialized structures that perform certain tasks within the cell. Cell theory refers to the idea as cells are the basic unit of structure in every living thing. Development of this theory during the mid-17th century was made possible by advances in microscopy. This theory is one of the foundations of biology.

"Theory, Practice and Techniques in Cell Biology" focuses on the underlying principles that illustrate both how cells function as well as how we study them. The theory says that new cells are formed from other existing cells, and that the cell is a fundamental unit of structure, function and organization in all living organisms. The text begins with an overview of cell and its functions and closes with a chapter on cell cycle and cell division. The book delivers comprehensive, clearly written, and richly illustrated content in a user-friendly format intended for graduate and undergraduate students of Life Sciences.
