SI EDITION

BRAJA M. DAS KHALED SOBHAN

## GEOTECHNICAL ENGINEERING

NINTH EDITION

### Principles of Geotechnical Engineering

Ninth Edition, SI

#### **BRAJA M. DAS, Dean Emeritus**

California State University, Sacramento

KHALED SOBHAN, Professor

Florida Atlantic University

Principles of Geotechnical Engineering, Ninth Edition, SI

Authors: Braja M. Das and Khaled Sobhan

Product Director, Global Engineering: Timothy L. Anderson

Senior Content Developer: Mona Zeftel

Associate Media Content Developer:

Ashley Kaupert

Product Assistant: Alexander Sham

Marketing Manager: Kristin Stine

Director, Higher Education Production:

Sharon L. Smith

Content Project Manager: Jana Lewis

Production Service: RPK Editorial Services, Inc.

Copyeditor: Lori Martinsek Proofreader: Harlan James Indexer: Braja M. Das

Compositor: MPS Limited

Senior Art Director: Michelle Kunkler

Cover and Internal Designer: Harasymczuk Design

Cover Image: Felipe Gabaldon, Getty Images

Intellectual Property

Analyst: Christine Myaskovsky

Project Manager: Sarah Shainwald

Text and Image Permissions Researcher:

Kristiina Paul

Manufacturing Planner: Doug Wilke

and Specific Gravity 68

Preface to the SI Edition vi

Preface	
	Online Course xi
About t	he Authors xiii
1	Geotechnical Engineering – A Historical Perspective 1
1.1	Introduction 1
1.2	Geotechnical Engineering Prior to the 18th Century 1
1.3	Preclassical Period of Soil Mechanics (1700–1776) 5
1.4	Classical Soil Mechanics—Phase I (1776–1856) 6
1.5	Classical Soil Mechanics – Phase II (1856–1910) 6
1.6	Modern Soil Mechanics (1910–1927) 7
1.7	Geotechnical Engineering after 1927 8
1.8	End of an Era 13
	References 14
2	Origin of Soil and Grain Size 16
2.1	Introduction 16
2.2	Rock Cycle and the Origin of Soil 16
2.3	Rock-Forming Minerals, Rock and Rock Structures 27
2.4	Soil-Particle Size 28
2.5	Clay Minerals 30
2.6	Specific Gravity $(G_s)$ 38
2.7	Mechanical Analysis of Soil 39
2.8	Particle-Size Distribution Curve 48
2.9	Particle Shape 55
2.10	Summary 57
	Problems 57
	References 63
3	Weight-Volume Relationships 64
3.1	Introduction 64
3.2	Weight-Volume Relationships 64

Relationships among Unit Weight, Void Ratio, Moisture Content,

3.4 3.5 3.6 3.7 3.8	Relationships among Unit Weight, Porosity, and Moisture Content 72 Relative Density 80 Comments on $e_{\max}$ and $e_{\min}$ 83 Correlations between $e_{\max}$ , $e_{\min}$ , $e_{\max} - e_{\min}$ , and Median Grain Size ( $D_{50}$ ) 85 Summary 88 Problems 88 References 94
4	Plasticity and Structure of Soil 95
4.1	Introduction 95
4.2	Liquid Limit (LL) 95
4.3	Plastic Limit (PL) 105
4.4	Plasticity Index 107
4.5	Shrinkage Limit (SL) 108
4.6	Liquidity Index and Consistency Index 113
4.7	Activity 114
4.8	Plasticity Chart 117 Soil Structure 118
	Summary 123
	Problems 124
	References 127
5	Classification of Soil 129
5.1	Introduction 129
5.2	Textural Classification 130
5.3	Classification by Engineering Behavior 132
5.4	AASHTO Classification System 132
5.5	Unified Soil Classification System 136
5.6	Comparison between the AASHTO and Unified Systems 139
3.1	Summary 150 Problems 151
	References 155
	Transfer 133
6	Soil Compaction 156
6.1	Introduction 156
6.2	Compaction – General Principles 157
6.3	Standard Proctor Test 158
6.4	
	Factors Affecting Compaction 162

6.5	Modified Proctor Test 165		
6.6	Empirical Relationships 167		
6.7	Structure of Compacted Clay Soil 177		
6.8	Effect of Compaction on Cohesive Soil Properties 178		
6.9	Field Compaction 181		
6.10	Specifications for Field Compaction 186		
6.11	Determination of Field Unit Weight of Compaction 188		
6.12	Evaluation of Soils as Compaction Material 195		
6.13	Design the control of		
6.14			
	Problems 205		
	References 210		
7	Permeability 212		
7.1	Introduction 212		
7.2	Bernoulli's Equation 212		
7.3	Darcy's Law 215		
7.4	Hydraulic Conductivity 217		
7.5	Laboratory Determination of Hydraulic Conductivity 218		
7.6	Relationships for Hydraulic Conductivity—Granular Soil 226		
7.7	Relationships for Hydraulic Conductivity—Cohesive Soils 232		
7.8	Directional Variation of Permeability 238		
7.9	Equivalent Hydraulic Conductivity in Stratified Soil 239		
7.10	Permeability Test in the Field by Pumping from Wells 244		
7.11	Permeability Test in Auger Holes 248		
7.12	Hydraulic Conductivity of Compacted Clayey Soils 250		
7.13	Moisture Content - Unit Weight Criteria for Clay Liner		
	Construction 252		
7.14			
	Problems 254		
	References 259		
8	Seepage 261		
8.1	Introduction 261		
8.2	Laplace's Equation of Continuity 261		
8.3	Flow Nets 263		
8.4	Seepage Calculation from a Flow Net 265		
8.5	Flow Nets in Anisotropic Soil 271		
8.6	Mathematical Solution for Seepage 274		

8.7	Uplift Pressure under Hydraulie Structures 276
8.8	Seepage through an Earth Dam on an Impervious Base 277
8.9	L. Casagrande's Solution for Seepage through an Earth Dam 28
8.10	Pavlovsky's Solution for Seepage through an Earth Dam 282
8.11	Filter Design 286
8.12	
	Problems 290
	References 294
9	In Situ Stresses 295
9.1	Introduction 295
9.2	Stresses in Saturated Soil without Seepage 295
9.3	Straceac in Catanata 10 11 11 11
9.4	Stresses in Saturated Soil with Upward Seepage 301 Stresses in Saturated Soil with Downward Seepage 304
9.5	Seepage Force 306
9.6	Heaving in Soil Due to Flow around Sheet Piles 309
9.7	Use of Filters to Ingress the F
9.8	Effective Stress in Partially Saturated Soil 318
9.9	Capillary Rise in Soils 319
9.10	Effective Stress in the Zone of Capillary Rise 322
9.11	Summary 325
	Problems 325
	References 330
0	Stresses in a Soil Mass 331
10.1	Introduction 331
10.2	Normal and Shear Stresses on a Plane 332
10.3	The Pole Method of Finding Stresses along a Plane 336
10.4	Stresses Caused by a Point Load 338
10.5	Vertical Stress Caused by a Vertical Line Load 341
10.6	Vertical Stress Caused by a Horizontal Line Load 343
10.7	Vertical Stress Caused by a Vertical Strip Load (Finite Width and Infinite Length) 345
0.8	Vertical Stress Councille III
0.9	Linearly Ingressing Vertical Land
0.10	Vertical Co. D. E. I.
0.11	Vertical Stress Due to Embankment Loading 356  Vertical Stress Below the Center of a Uniformly Loaded
	Circular Area 360

10.12	Vertical Stress at Any Point below a Uniformly Loaded Circular Area 362
10.12	Vertical Stress Caused by a Rectangularly Loaded Area 366
10.13	272
	D D D D 1 275
10.15	Stress Distribution for Westergaard Material 378
10.16	
10.17	Summary 381 Problems 382
	References 389
11	Compressibility of Soil 390
11.1	Introduction 390
11.2	Contact Pressure and Settlement Profile 391
11.3	Relations for Elastic Settlement Calculation 393
11.4	Improved Relationship for Elastic Settlement 396
11.5	Fundamentals of Consolidation 405
11.6	One-Dimensional Laboratory Consolidation Test 409
11.7	Void Ratio-Pressure Plots 412
11.8	Normally Consolidated and Overconsolidated Clays 415
11.9	Effect of Disturbance on Void Ratio-Pressure Relationship 419
11.10	Calculation of Settlement from One-Dimensional Primary
	Consolidation 420
11.11	Correlations for Compression Index $(C_c)$ 422
11.12	Correlations for Swell Index $(C_s)$ 424
11.13	
11.14	
11.15	Construction Time Correction of Consolidation Settlement 444
11.16	Determination of Coefficient of Consolidation 447  Calculation of Consolidation Settlement under a Foundation 454
11.17	Calculation of Consolidation Settlement and a
11.18	Methods for Accelerating Consolidation Settlement 456
11.19	Summary 459
	Problems 460
	References 467
12	Shear Strength of Soil 469
12.1	Introduction 469
12.2	Mohr–Coulomb Failure Criterion 469
12.3	Inclination of the Plane of Failure Caused by Shear 471
12.0	

12.4	Laboratory Test for Determination of Shear Strength Parameters 473		
12.5	Direct Shear Test 473		
12.6	Drained Direct Shear Test on Saturated Sand and Clay 478		
12.7	General Comments on Direct Shear Test 481		
12.8	Triaxial Shear Test-General 486		
12.9	Consolidated-Drained Triaxial Test 487		
12.10	Consolidated-Undrained Triaxial Test 497		
12.11	Unconsolidated-Undrained Triaxial Test 505		
12.13	Unconfined Compression Test on Saturated Clay 509		
12.10	Empirical Relationships between Undrained Cohesion (c_)		
	and Effective Overburden Pressure (\(\sigma_c'\) 511		
12.14	Sensitivity and Thixotropy of Clay 512		
12.1	Strength Anisotropy in Clay 514		
12.14	Vane Shear Test 516		
12.17	Other Methods for Determining Underland Share St.		
12,18	Shear Strength of Unsaturated Cohesive Soils 523		
12.19	Summary 526		
	Problems 527		
	References 533
