ABSTRACT

SANGALANG, DIANE C. BACKYARD HOG FATTENING AT MAHABANG KAHUY, CERCA, INDANG CAVITE (2016). Enterprise Development Project. Bachelor of Agricultural Entrepreneurship Major in Animal Production. Cavite State University, Indang, Cavite. January 2016 Adviser: Dr. Cristina F. Olo.

Four weanlings with an average initial body weight of 18 kilograms were used in the project. After 101 days, the animals were sold on live weight basis with an average body weight of 80kilograms. The average daily gain weight of the hogs was 560 grams. The hogs consume a total of 800kg feeds which resulted to a feed conversion efficiency of 3.52 kg. Gross sales on live weight hogs amounted to ₱ 42,160.00. The total expenses incurred in completing the entire project amounted to ₱ 39,090.00, thus resulting to total net income of ₱ 6,070.00 and a 16.82% return on investment. The entrepreneur project was profitable and was able to make the student to learn the proper management and knowledge in handling an enterprise.

BACKYARD HOG FATTENING AT MAHABANG KAHUY, CERCA, INDANG, CAVITE: AN ENTREPRENEURIAL DEVELOPMENT PROJECT (2016)

Diane C. Sangalang

An Entrepreneurial Development Project Report presented to the faculty of the Department of Animal Science, College of Agriculture, Food, Environment and Natural Resources, Cavite State University, Indang, Cavite, in partial fulfillment of the requirement for the completion to the degree of Bachelor of Agricultural Entrepreneurship with contribution number _____. Prepared under the supervision of Cristina F. Olo, Ph.D.

INTRODUCTION

Hog raising is a very popular enterprise in the Philippines seem is a proliferation of backyard producers, which comprises the majority in the swine industry, (BAR, 2012). Despite the problem being faced by the swine industry, still many people are venturing in the enterprise. Many student and would-be hog farmers need more information and the study of the topic.

Having the swine industry as the leading livestock source (DA, 2011), many in experienced managers go to business without having experience or knowledge about the swine raising production just for the high profit it gives and eventually fail because of the lack of skill and knowledge in hog raising. Regardless, of this problem, hog raising is still a viable enterprise to go into, if given the right information and experience Also this enterprise is very viable enthusiastic this country is largely a pork consumer. Thinking about the demand increase in pork and the imminent danger of avian diseases in recent
