The content, statements, views, and opinions herein are the sole expression of the respective authors and not that of Jones & Bartlett Learning, LLC. Reference herein to any specific commercial product, process, or service by trade name, trademark, manufacturer, or otherwise does not constitute or imply its endorsement or recommendation by Jones & Bartlett Learning, LLC and such reference shall not be used for advertising or product endorsement purposes. All trademarks displayed are the trademarks of the parties noted herein. *Core Curriculum for Interdisciplinary Lactation Care* is an independent publication and has not been authorized, sponsored, or otherwise approved by the owners of the trademarks or service marks referenced in this product.

There may be images in this book that feature models; these models do not necessarily endorse, represent, or participate in the activities represented in the images. Any screenshots in this product are for educational and instructive purposes only. Any individuals and scenarios featured in the case studies throughout this product may be real or fictitious, but are used for instructional purposes only.

The authors, editor, and publisher have made every effort to provide accurate information. However, they are not responsible for errors, omissions, or for any outcomes related to the use of the contents of this book and take no responsibility for the use of the products and procedures described. Treatments and side effects described in this book may not be applicable to all people; likewise, some people may require a dose or experience a side effect that is not described herein. Drugs and medical devices are discussed that may have limited availability controlled by the Food and Drug Administration (FDA) for use only in a research study or clinical trial. Research, clinical practice, and government regulations often change the accepted standard in this field. When consideration is being given to use of any drug in the clinical setting, the health care provider or reader is responsible for determining FDA status of the drug, reading the package insert, and reviewing prescribing information for the most up-to-date recommendations on dose, precautions, and contraindications, and determining the appropriate usage for the product. This is especially important in the case of drugs that are new or seldom used.

Index .....		519

CORE CURRICULUM FOR

# Interdisciplinary Lactation Care

*Edited by*

**Suzanne Hetzel Campbell | Judith Lauwers | Rebecca Mannel | Becky Spencer**

*“As an International Board Certified Lactation Consultant (IBCLC), physician, and educator with more than 25 years of experience with training others in lactation, I am very enthusiastic about the publication of this text. The impact it will have on the different environments in the clinical practice of human lactation will be enormous. Whether as a text for academic and professional-level human lactation courses or as a reference in the clinic, it provides evidence-based information that will undoubtedly help us expand our knowledge and assist our clients or patients in making informed decisions.”*

~ From the Foreword by

**Ana M. Parrilla-Rodríguez,**  
MD, MPH, FABM, IBCLC, FACCE  
Professor, Maternal and Child Health Program,  
School of Public Health, University of Puerto Rico  
Director, Certificado Profesional en Educador  
en Lactancia, Academia Edupró

*Core Curriculum for Interdisciplinary Lactation Care* provides a trustworthy source for lactation-specific information and education for students, interns, certification candidates, instructors, and clinicians—in any discipline or specialty—who provide care to breastfeeding families. Published in association with the Lactation Education Accreditation and Approval Review Committee (LEAARC), it reflects the current state of practice and serves as a fundamental resource for beginning clinicians, orienting staff, and planning continuing education programs.

Organized in three sections, *Core Curriculum for Interdisciplinary Lactation Care* focuses on the science, management, and professional aspects of lactation care. With contributions from a team of clinical lactation experts from several countries around the world, it emphasizes an interdisciplinary approach to provide comprehensive care for breastfeeding families. Written to complement the LEAARC curriculum used in recognition of lactation education programs, the text includes clinical applications that move from theory to practice, including key learning points, clinical case studies, and real-life stories from parents and the healthcare team.
