ABSTRACT

FELLO, RENCEL ROAN C., Demographic Characteristic and Level of Inter Personal Relationship of Juvenile Laborer in Selected Area of Cavite. Undergraduate thesis. Bachelor of Science in Psychology. Cavite States University, Indang, Cavite. April 2009. Adviser: Evalyne A. Rodriguez

The study entitled "Demographic Characteristic and Level of Inter Personal Relationship of Juvenile Laborer in Selected Area of Cavite" was conducted in Indang, Trece Martires, Dasmarinas, Olivares, Tagaytay and Silang Cavite from October, 2008 to January, 2009.

It also aimed to; (a) determine the demographic characteristic of the respondent; (b) determine the level of intra personal relationship of respondent toward friends, family and other; and (c) determine the significant relationship of the demographic characteristic and level of inter personal relationship.

Descriptive- correlational design was employed in the study. This kind of research is concerned to determine if there is a significant relationship of demographic characteristic to the level of interpersonal relationship. Convenience sampling was used to find their respondents.

The study has two hundred (200) respondents from ,Indang, Trece Martires, Dasmarinas, Tagaytay Olivares and Silang Cavite.

The researcher used modified questionnaire in La Salle by Loradel Mae Sangco and Caren Sarmiento entitled "level of self esteem and social adjustment of selected street children with separated parents". The questionnaire was consisted of 30 items measuring the level of interpersonal relationship.

The result revealed that the total respondents have high level of inter personal relationship toward friends, family and others, they have a high capability to interact with other personality or group, they can easily understand them. And the result revealed that there is no significant relationship between demographic characteristic and level of inter personal relationship respondents.
