ABSTRACT

NAVERA, BENEDICT G., DE CASTRO, LALAIN H. and RAMILO, VIA A. **Implementation of Security and Safety Protocols in Cavite State University Main Campus Amidst Covid-19 Pandemic.** Undergraduate Thesis. Bachelor of Science in Industrial Security Management. Cavite State University, Indang, Cavite. June 2022. Adviser: Ms. Silkie C. Tuginay.

This study was conducted to comprehend information that can help Cavite State University-main campus to improve and develop its existing Physical Security with regard to the level of physical security amidst Covid-19. This includes the problems encountered by Cavite State University-main campus in the implementation of physical security amidst Covid-19 and the significant relationship between the level of Physical Security and the problems encountered by the campus. Physical security refers to the installations and policies implemented to safeguard an establishment, asset, and the feeling of free from harm or danger. This research discussed the level of physical security, problems encountered, and their significant relationship. Hence, it focused on identifying the level of physical security to determine if the people visiting and the skeletal workforce in Cavite State University-main campus are free from harm or danger while performing their task in their workplace. This study used Quantitative research design and 100 participants who were working as part of the skeletal workforce participated in the data gathering. Security personnel, housekeeping, students, and faculty members participated in the study. This study presented information about the level of physical security in the campus amidst Covid-19 pandemic, problems encountered in the implementation, and the relationship between these two. Based on the result, the researchers derived to a conclusion that there could be a good level of Physical Security if there is cooperation with one another. Moreover, the plans and measures were discussed to the employees about its importance to follow the rules and regulation, and to act immediately when there is a risk.

IMPLEMENTATION OF SECURITY AND SAFETY PROTOCOLS IN CAVITE STATE UNIVERSITY MAIN CAMPUS AMIDST COVID-19 PANDEMIC

**Benedict G. Navera
Lalaine H. De Castro
Via A. Ramilo**

An undergraduate thesis presented to the faculty of the College of Criminal Justice, Cavite State University, Indang, Cavite in partial fulfillment of the requirements for the degree Bachelor of Science in Industrial Security Management with Contribution No. CCJ-2022-94. Prepared under the supervision of Ms. Silkie C. Tuguinay, MSCJ.

INTRODUCTION

The pandemic caused changes to the different aspects of life. Returning to school has become a source of worries for the parents and other people during the occurrence of Covid-19. Schools must balance the educational, social, and emotional needs of the students. In addition, there is a need to secure the health and safety of the students and staff in the midst of the evolving COVID-19 pandemic. The decision on the learning modality is usually made by the local level by schoolboards and the government officials.

Overall, schools largely choose from one of the three. First, distance learning pertains to the instruction that is done remotely using technology and other tools. Next, In-person schooling is similar to traditional schooling with enhanced health and safety precautions and procedures. Lastly, Hybrid schooling includes elements of both distance and in-person schooling. Schools may adopt one or more approaches during the course of the school year and pandemic. Being prepared for a variety of schooling environments can empower parents and children to reduce anxiety. In each case, there are steps to be taken to reduce the risks of COVID-19 which will help the child feel safe and be informed during the COVID-19 pandemic.

The U.S. Food and Drug Administration (FDA) has authorized the Pfizer-
